IHA CARE: IHACare guarantees a student will have a working laptop as long as she is a student at IHA. This includes use of an IHA loaner when computers are being serviced at IHA. Includes in-house labor costs.

Class of 2030 Program Information

- **Will every student be required to purchase an IHA Laptop?**

YES! All incoming freshmen will be required to purchase the laptop from the school. The laptops are specifically configured for the school's wireless environment and include a variety of classroom software programs. NO OTHER LAPTOP will be permitted. Please do NOT call the school to request the use of another laptop. This is a critical aspect of the program and no exceptions can be made.

- **Does IHA restrict or control software?**

Due to recent changes to College Board requirements and other learning needs, IHA does configure restrictions on how students can use their laptop during the school day. This is being done using our MDM (Mobile Device Management) configuration. Students, however, will be allowed configure most aspects of their laptop for use when off campus and all limitations will be removed when they graduate. A laptop can be restored to its initial IHA state at any time by student request. Internet access is filtered by our servers while at school.

- **How will parents pay for the laptop?**

Payment can be made through the online enrollment portal and can pay via credit card (3.05% fee) or via electronic check (\$2.50 fee).

- **How will the laptops be used for educational purposes at IHA?**

Immaculate Heart Academy recognizes that technology is vital in preparing students for lifelong learning and workforce readiness. It has been our goal to integrate technology into all aspects of our curriculum, so as to inspire a collaborative learning environment where students can effectively find, synthesize, analyze and produce content, all while promoting the safe and ethical use of technology.

- **Is all this really necessary?** Technology is an integral part of student and professional life. It continues to shape our culture and our way of life. As a preparatory academy, Immaculate Heart Academy believes firmly that providing students with relevant technology will best prepare them to utilize new technologies with confidence and competence.

- **When will my daughter receive her laptop?**

All laptops will be distributed during their Freshmen Technology Orientation Session tentatively set for Tuesday July 28, Tuesday August 18, and Thursday August 27.
